PROFESSIONAL SUMMARY

Aspiring Software Developer with hands-on experience in developing full-stack web applications using Python and Django. Strong foundation in object-oriented programming, data structures, RESTful APIs, and database management. Passionate about building scalable, secure, and user-centric applications while continuously learning modern software development technologies

TECHNICAL SKILLS

Programming Languages: Python, JavaScript

Frontend: HTML, CSS

Backend Frameworks: Django

Databases: MySQL, PostgreSQL, MongoDB

Developer Tools & Technologies: Git, GitHub, Docker, Postman Linux, VS Code, MS Excel

EDUCATION

Bachelor of Engineering – Computer Science and Engineering(Cyber Security) 2023 – 2027

Sri Shakthi Institute of Engineering and Technology

CGPA: 7.33 (Ongoing)

Higher Secondary Certificate (HSC) 2023

Thiyagi N G Ramaswamy Memorial Higher Secondary School

Percentage: 81.5%

Secondary School Leaving Certificate (SSLC) 2021

Kalaimagal Matric Higher Secondary School

Result: Pass

PROJECTS

FruitCart – Full Stack E-Commerce Web Application

- Developed a full-stack e-commerce web application using Django, PostgreSQL (Supabase), HTML, CSS, JavaScript, and Render, enabling users to browse, purchase, and manage fresh fruit orders online.
- Implemented secure user authentication and role-based authorization using Django's built-in authentication system, supporting user registration, login, logout, and protected admin functionalities.
- Built a complete shopping cart and order management system, allowing users to add products, update quantities, remove items, and place orders with real-time inventory tracking.
- Integrated Supabase PostgreSQL for cloud-hosted database management and Supabase Storage for product image handling, ensuring scalable and reliable data storage.
- Designed a responsive and modern user interface with category filtering, dark mode, animated product cards, sticky navigation, and mobile-friendly layouts to enhance user experience

SafePipe – Secrets Leak Detection & Alerting in CI/CD Pipelines

- Built a DevSecOps tool to detect exposed secrets (API keys, passwords, tokens, private keys) across source code repositories and CI/CD pipelines.
- Developed an automated scanning engine in Python using regex-based pattern matching for real-time secret detection and security analysis.
- Designed an interactive Streamlit dashboard to visualize scan results, security alerts, and compliance reports.
- Integrated automated security checks into CI/CD workflows to enable early detection of credential leaks during development.
- Implemented centralized logging and JSON-based reporting to strengthen security monitoring, auditing, and compliance.

CERTIFICATIONS

- Operate with DevOps – Microsoft
- Introduction to Cybersecurity – SimpliLearn
- Python – Scalar

WORKSHOPS & TRAINING

Cybersecurity Tools Workshop April 2025

Sri Shakthi Institute of Engineering and Technology – Department of CSE (Cyber Security)

- Completed hands-on training on industry-standard penetration testing tools, including Burp Suite and Metasploit.

KEY STRENGTHS

Problem-Solving & Critical Thinking | Discipline & Consistency | Communication Skills
