PROFILE

Passionate and detail-oriented cybersecurity enthusiast with expertise in VAPT, red teaming, and secure software practices. Skilled in identifying, analyzing, and mitigating vulnerabilities across web applications, networks, and cloud environments. Recognized in national hackathons and holder of a published patent in automated CIS auditing. Experienced in SOC operations, threat detection, and incident response, currently contributing as SOC L1 at Futuresafe. Adept at leveraging security tools such as Heimdal (MXDR), Petra, Blackpoint, SentinelOne, and Flare to monitor and respond to threats efficiently. Committed to continuous learning, hands-on testing, and driving security improvements through automation and proactive risk assessment.

EXPERIENCE:

- Cyber Security Analyst, FutureSafe**08/2025 – 11/2025
- SOC Analyst handling threat detection and response, working with Heimdal (MXDR), Petra, Blackpoint, SentinelOne, and Flare, including managing related tickets.
- Security Analyst, BoredMonk Pvt.Ltd**06/2025 – 07/2025
- Conducted web application penetration testing for a finance company, simulating real-world attacks to identify and mitigate security risks.
- Blackbox penetration tester, DETOXIO.AI**03/2025 – 04/2025
Remote
- Performed black-box penetration testing on AI-driven applications, identifying security flaws and reporting vulnerabilities to enhance overall system security.

EDUCATION:

- BE CSE(Cyber Security), Sri Shakthi Institute of Engineering and Technology**2023 – 2027
CGPA:9.14Coimbatore.
- SanJose Matriculation Higher Secondary School.**
HSC Percentage:86

SKILLS:

- SOC
 - Cloud Security
 - Forensics
 - Log Analysis
- VAPT
 - API-Security
 - Bash Scripting
 - Programming-JAVA

KEY-ACHIEVEMENTS:

- Hack-24 Hackathon, Dr. NGPiTech**
Won Beacons of Brilliance award at Dr. NGPiTech; ranked in top 5 among 50+ teams.
- HACKQUEST CTF Winner, Cyberheals**
Secured 1st place out of 556 teams in a CTF by Cyberheals, focused on web security challenges.
- Cyberthon 2025**
Secured 5th position in a national cybersecurity hackathon, earning an internship.

KICTF 2025, *KCT, Coimbatore* Secured th
place in KICTF at KCT, Coimbatore.

ACNCTF 2025, *Amrita CTF*

Secured 2nd place at Amrita CTF.

VOLUNTEERING:

Technical Coordinator

Organized and supported community-driven security initiatives, workshops, and knowledge-sharing sessions to promote secure software practices.

Website Coordinator

Managed and maintained the chapter's online presence, ensuring timely updates, content accuracy, and effective digital communication.

PROJECTS:

CIS Audit tool: Developed a Windows-focused CIS Audit Tool that automates security auditing based on CIS Benchmarks. The tool checks system configurations, ensures compliance with Windows security standards, and generates detailed, customizable reports- streamlining the auditing process for enterprise environments.

STACKS:PYTHON(PySide6), BASH, POWERSHELL

Crime Hotspot Mapping & Behavior Analysis System:

Designed a system that visualizes crime-prone areas using geospatial data and analyzes behavioral patterns to assist law enforcement in proactive crime prevention and resource allocation.

STACKS:MERN

Automatic whatsapp Scheduler:

Developed an automated WhatsApp birthday video scheduler using Python, MySQL, Selenium, PyAutoGUI, Pyperclip, PIL, MoviePy, and NumPy. The system generates personalized greeting cards with user photos, compiles them into a video with background music, adds dynamic effects, and sends them to WhatsApp groups, handling varying screen resolutions and UI layouts.

STACKS:Python, MySQL, PIL/Pillow, NumPy, MoviePy, PyAutoGUI, Pyperclip.

Student Management System:

Built a role-based Attendance management system with attendance tracking ,leave records and requests, performance insights and bulk database uploads using MySQL and a web interface.

STACKS:HTML,Bootstrap,MySQL,php.

MCP For Cybersecurity:

Developed the Model Context Protocol (MCP) to enhance Gemini-CLI, integrating tools like Nmap and Metasploit for automated cybersecurity tasks, achieving 85% efficiency and 40% faster task completion, including CTF challenges.

CERTIFICATIONS:

- **CISCO**-Network Security, Intro to Cybersecurity
- **APISEC University**-ACP(APISEC Certified Practicioner).
- **TryHackMe**-Advent of cyber-2024, Junior Penetration Tester, Web Fundamentals, Web App Fundamentals, Red Teaming.
- **SecOps**-CAP,CNSP.
- **LetsDefend**-SOC Analyst Learning path,DFIR Learning path.
- **HackTheBox**-Pwned many active machines.
